

# Financial Results of Fiscal 2024

May 13, 2025

KYORIN Pharmaceutical Co., Ltd.  
Representative Director, President and CEO  
**Yutaka Ogihara**

- **Outline of Consolidated Financial Results**
- **Trends of Mainstay Products, Generic Product**
- **Consolidated Financial Forecast**
- **Status of R&D Pipeline**
- **Initiatives toward Realization of Vision 110 –Stage 1–**
- **Initiatives to improve corporate value in the medium to long term and drive sustainable growth**

## **Outline of Consolidated Financial Results**

## Breakdown of Gain and Loss for FY2024

(Units: JPY billions)

	FY2023	FY2024	Year on year	
			Change	Change (%)
Net Sales	119.5	<b>130.1</b>	<b>+10.6</b>	<b>+8.8</b>
New drugs, etc. (Japan)	82.6	<b>84.2</b>	<b>+1.6</b>	<b>+1.9</b>
New drugs (overseas)	0.4	<b>8.9</b>	<b>+8.5</b>	<b>+2195.2</b>
Generic drugs	36.6	<b>37.1</b>	<b>+0.5</b>	<b>+1.4</b>
Cost of sales	67.9	<b>70.6</b>	<b>+2.7</b>	<b>+3.9</b>
SG&A (R&D)	45.4 (8.0)	<b>47.0</b> <b>(10.5)</b>	<b>+1.6</b> <b>(+2.5)</b>	<b>+3.5</b> <b>(+31.1)</b>
Operating profit	6.2	<b>12.6</b>	<b>+6.4</b>	<b>+101.6</b>
Ordinary profit	6.8	<b>13.2</b>	<b>+6.4</b>	<b>+93.8</b>
Profit attributable to owners of parent	5.5	<b>9.1</b>	<b>+3.6</b>	<b>+66.0</b>

\*Company has changed its accounting policies starting from FY2024, and the figures for the previous period have been retrospectively adjusted and are presented accordingly.

(Units: JPY billions)

New drugs, etc. (Japan)

+1.6

Factor of decrease

- Decrease in sales of long-listed products

Factor of increase

- New drugs grew (Beova, Lasvic, Flutiform etc.)

New drugs (Overseas)

+8.5

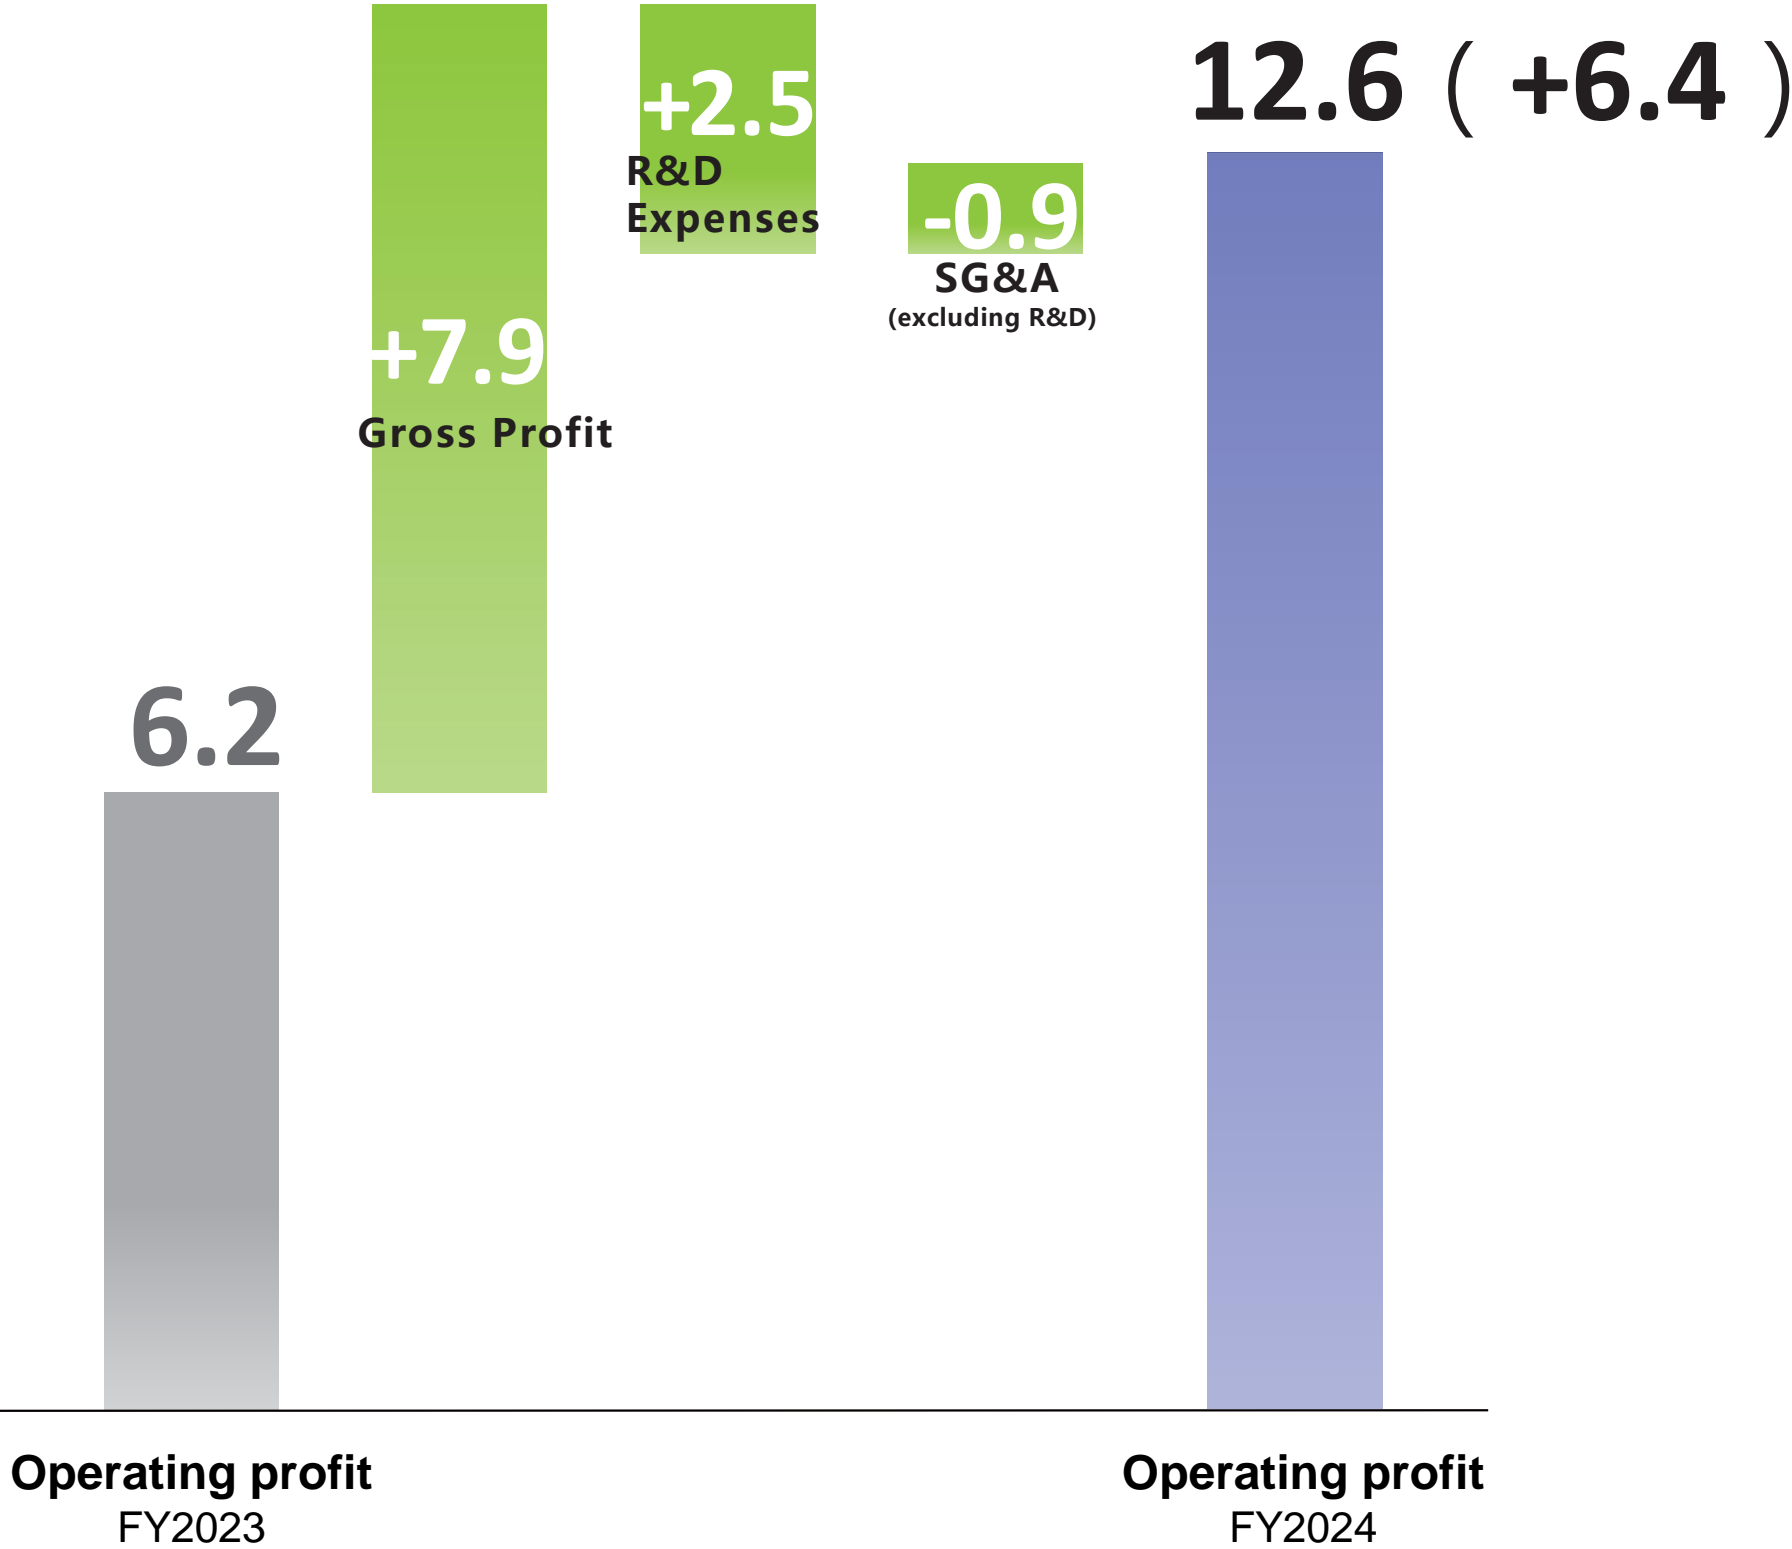

- Received upfront payment for KRP-M223 8.2 billions

Generic drugs

+0.5

- Sales contribution of newly listed products in FY2024
- Decrease in sales of AG etc. due to NHI drug price revisions

(Units: JPY billions)

Gross Profit

+7.9

Net Sales +10.6

Cost of sales ratio -2.6%pt

Factor of Increase

- Impact of NHI drug price revisions (Kyorin Pharmaceutical: 7% range)
- Impact of exchange fluctuation

Factor of Decrease

- Increase in sales of new drugs (Beova, Lasvic etc.), Improve in a ratio of new drugs
- Received upfront payment of KRP-M223: 8.2 billion yen

R&D Expenses

+2.5

8.0 (FY2023) ⇒ 10.5 (FY2024)

Upfront payment of KRP-S124: 2.4billion yen

SG&A (excluding R&D)

-0.9

37.4 (FY2023) ⇒ 36.5 (FY2024)

- Increase in license fees etc.
- Decrease in depreciation expenses, personnel expenses

Highlights of Business Performance (3/3) YoY: Vs Forecast

		FY2024 forecast (announced on May 10, 2024)	FY2024 Actual	Vs. forecast	
				Change	Achievement(%)
Net Sales		123.4	130.1	+6.7	105.4
	New drugs, etc. (Japan)	84.7	84.2	-0.5	99.4
	New drugs (overseas)	0.4	8.9	+8.5	2215.1
	Generic drugs	38.2	37.1	-1.1	97.0
Cost of sales		-	70.6	-	-
SG&A (R&D)		-	47.0	-	-
		(8.5)	(10.5)	(+2.0)	(123.7)
Operating profit		6.5	12.6	+6.1	193.4
Ordinary profit		6.9	13.2	+6.3	191.6
Profit attributable to owners of parent		5.0	9.1	+4.1	181.7

Difference from the forecast announced on May 10, 2024

Net sales	Significantly increased in sales of the new drugs (overseas) due to received upfront payment of KRP-M223
R&D expenses:	Upfront payment of KRP-S124: 2.4 billions
SG&A expenses	Cost reduction
(excluding R&D expenses)	

(Units: JPY billions)

		FY2023 Actual	FY2024 Actual	Year-on-year		FY2024 Forecast (announced on May 10,2024)	Vs Forecast	
				Change	Change (%)		Change	Achievement (%)
New Drugs, etc. (Japan)	Beova (KYORIN)	18.1	22.1	+4.0	+21.9	22.0	+0.1	100.4
	Lasvic	4.9	7.8	+2.9	+58.7	6.4	+1.4	122.6
	Lyfnua	0.8	0.9	+0.1	+10.6	1.5	-0.6	60.9
	Desalex	8.9	9.6	+0.7	+8.6	9.6	0	100.2
	Flutiform	12.9	13.7	+0.8	+6.8	12.5	+1.2	109.9
	Pentasa	12.3	12.2	-0.1	-0.8	11.6	+0.6	104.9
	Kipres	7.0	3.5	-3.5	-49.8	5.3	-1.8	66.1
	Mucodyne	4.2	3.6	-0.6	-15.6	4.3	-0.7	83.0

	Rubysta	1.5	1.1	-0.4	-27.5	1.5	-0.4	73.8
Generic Drugs	Montelukast tablets “KM”	12.3	12.0	-0.3	-2.6	11.8	+0.2	101.4
	Mometasone Nasal 50mg “KYORIN”	4.5	4.1	-0.4	-9.3	4.3	-0.2	95.7
	Imidafenacin tablets & OD “KYORIN”	0.6	0.5	-0.1	-8.3	0.5	0	109.8

## **Trends of Mainstay Products, Generic Product**

Copyright © 2025 IQVIA. Calculated based on JPM 2021 Mar MAT-2025 Mar MAT. Reprinted with permission

Market	OAB market: +3.2%*1 Market expansion of β3 adrenergic receptor
Medium to long-term market outlook	Number of OAB patients tend to increase Market is forecast to remain flat due to impact of NHI drug price revision and launch generic drug Market expansion for β3 adrenergic receptor.

Status In FY2024	● No.1 in OAB market sale*2 ● No.1 share of OAB patients and rate of new patients acquisition*2 [NHI drug price revision: Beova – 5.27% (Apr 2024)]
------------------	---

\* 2 Combined total with partner company

Status  
In FY2024

- Initiative to extend the patient's period of taking drug (appealing effectiveness/safety including long-term data)
  - Enhancement of better understanding for product characteristic (suppressing cough caused by nerve hypersensitivity)
- [NHI drug price revision: -0.05 % (Apr 2024)]

Market	Antihistamine market: −2.9%*
Medium to long-term market outlook	While the number of patients tends to increase, the market is shrinking as a result of the NHI drug price revision and generic drugs.

Status In FY2024	<ul style="list-style-type: none"><li>Sales increased steadily</li><li>Focus on acquiring prescriptions in otolaryngology and internal medicine [NHI drug price revision: −9.36% (Apr 2024)]</li></ul>
------------------	--

Market	ICS/LABA market: -6.0%* Increase to seek treatment after Covid-19, and promote to switch to generic drugs
Medium to long-term market outlook	While the number patients tend to increase, Market is forecast to remain flat due to NHI drug price revision and generic drug, etc.

Status FY2024	<ul style="list-style-type: none"><li>● Sales increased steadily</li><li>● Market share in terms of volume: 18.7% (Mar 2024) to 19.4% (Mar 2025)</li><li>● Synergy effects with Lyfnua promotion [NHI drug price revision: -6.31% (Apr 2024)]</li></ul>
---------------	---

\* Copyright © 2025 IQVIA. Calculated based on JPM 2024 Mar MAT, 2025 Mar MAT. Reprinted with permission

- Status  
FY2024
- New products launched in June 2024:  
ZONISAMIDE OD Tablets TRE 25mg, 50mg
- Initiative  
FY2025
- Expand sales of mainstay products

- Status  
(AG)  
FY2024
- Negative factor: Sales decreased due to NHI drug revision  
Positive factor: Improve the number of sales  
Keep market share of 50% in AG

## Consolidated Financial Forecast

# Consolidated Financial Forecast for FY2025

		FY2024	FY2025	Year on year	
				Change	Change (%)
Net sales		130.1	<b>127.0</b>	-3.1	-2.4
	New drugs, etc. (Japan)	84.2	<b>89.0</b>	+4.8	+5.8
	New drugs (overseas)	8.9	<b>0.2</b>	-8.7	-97.7
	Generic drugs	37.1	<b>37.7</b>	+0.6	+1.7
Cost of sales		70.6	—	—	—
SG&A (R&D)		47.0	—	—	—
		(10.5)	<b>(10.4)</b>	(-0.1)	(-1.1)
Operating profit		12.6	<b>6.1</b>	-6.5	-51.5
Ordinary profit		13.2	<b>6.3</b>	-6.9	-52.3
Profit attributable to owners of parent		9.1	<b>4.8</b>	-4.3	-47.2

## <Key factors of change>

Net sales

While sales of New drugs (Beova, Lasvic etc.) are expected increase, net sales are anticipated to decrease due to reactionary drop from received upfront payment of KRP-M223

Operating profit

Gross profit is expected to decrease due to an increase in the cost of sales. SG&A expenses are expected to remain flat, leading to an anticipated decrease in profit.

Cost of sales ratio

+4%pt

SG&D ratio (excluding R&D expenses)

+1%pt

R&D expenses

-0.1 billion yen: reactionary drop from upfront payment of KRP-S124, booking clinical trial expense for KRP-R120

Consolidated Financial Forecast for FY2025

(Comparable analysis excluding the impact of KRP-M223)

(Units: JPY billions)

		FY2024	FY2024 Excluding received upfront payment of KRP-M223	FY2025	Year on year	
					Change	Change (%)
Net sales		130.1	121.8	127.0	+5.2	+4.2
	New drugs, etc. (Japan)	84.2	84.2	89.0	+4.8	+5.8
	New drugs (overseas)	8.9	0.6	0.2	-0.4	-68.4
	Generic drugs	37.1	37.1	37.7	+0.6	+1.7
Cost of sales		70.6	70.6	—	—	—
SG&A (R&D)		47.0	47.0	—	—	—
		(10.5)	(10.5)	(10.4)	(-0.1)	(-1.1)
Operating profit		12.6	4.3	6.1	+1.8	+40.5

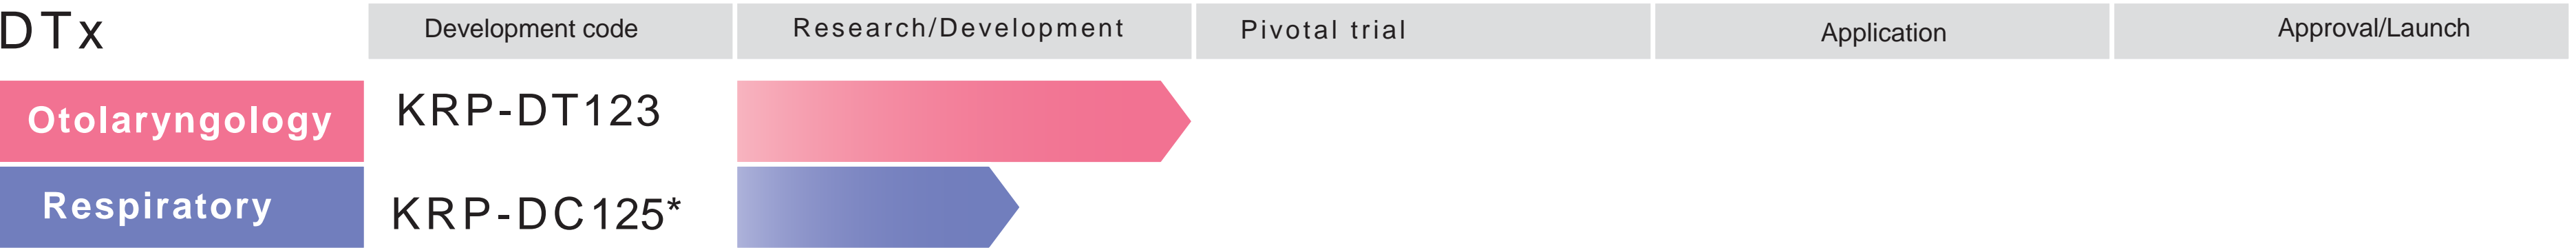

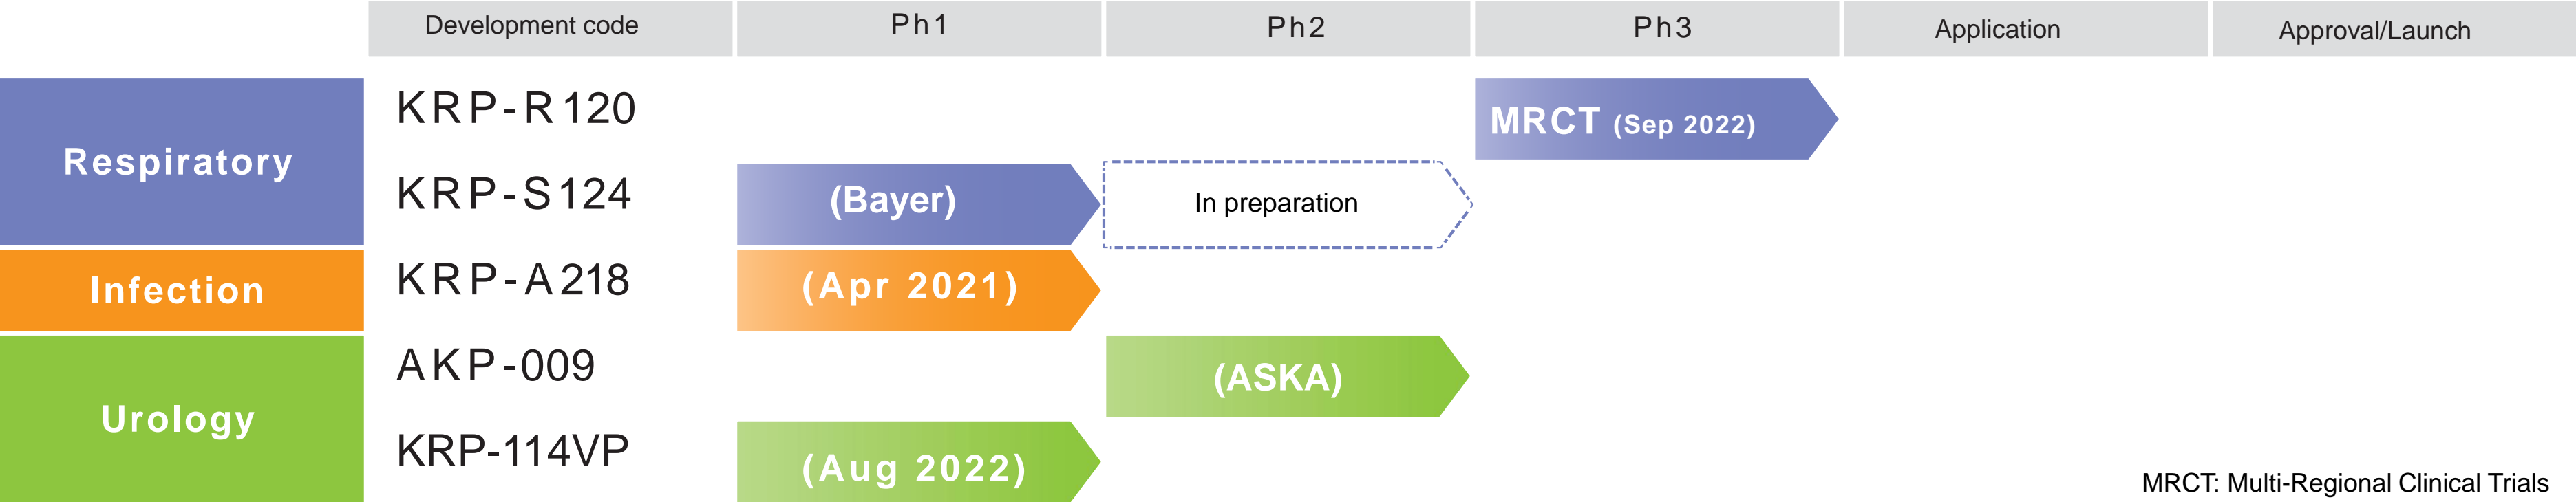

Net sales are expected to increase by 5.2 billion yen due to an increase in sales of new drugs (Beova, Lasvic), and operating profit is expected to increase by 1.8 billion yen.

(Units: JPY billions)

		FY2024 Actual	FY2025 Forecast	Year-on-year	
				Change	Change (%)
New Drugs, etc. (Japan)	Beova (KYORIN)	22.1	25.1	+3.0	+13.7
	Lasvic	7.8	8.5	+0.7	+8.3
	Lyfnua	0.9	1.1	+0.2	+20.4
	Desalex	9.6	10.1	+0.5	+5.0
	Flutiform	13.7	13.2	-0.5	-3.9
	Pentasa	12.2	11.6	-0.6	-4.7
	Kipres	3.5	2.1	-1.4	-40.0
	Mucodyne	3.6	5.2	+1.6	+45.8
	Milton	1.8	1.8	0	-2.3
	Rubysta	1.1	1.0	-0.1	-9.7
Generic Drugs	Montelukast tablets “KM”	12.0	11.3	-0.7	-5.6
	Mometasone Nasal 50mg “KYORIN”	4.1	4.3	+0.2	+4.5

## ■ Statue of R&D Pipeline

\*Updated (As of May 12, 2025)

Licensed Compound	Compound/Code	Licensee	Stage	Features
	KRP-M223*	Novartis	Pre-clinical	●MRGPRX2 antagonist ●Target: allergic and inflammatory diseases involving mast cells
	KRP-203	Priothera	Ph3	●Sphingosine-1-Phosphate receptor Agonist ●Target: AML patients undergoing HSCT ●Assignment of IP and drug substances (Sep 2020)

Compound/Code	Origin	Stage	Target disease	Features
BDT272	BIODOL Therapeutics	Ph1 In France	Pain	<ul style="list-style-type: none"><li>● Press release on Jan 2025</li><li>● FLT3 inhibitor</li><li>● Patient market of 23 million (Japan)</li></ul>

**Based on the results of the Phase 1 trial, the decision on whether to transition to a licensing agreement will be made within FY2025.**

Compound/Code	Origin	Stage	Target disease	Features
CYR-064	Cyrano Therapeutics	Ph2 In USA	Post-viral loss of smell	<ul style="list-style-type: none"><li>● Press release on Feb 2025</li><li>● PDE inhibitor</li><li>● Patient market of 1 million (Kyorin estimated)</li></ul>

**Based on the results of the Phase 2 trial, the decision on whether to transition to a licensing agreement will be made within FY2025.**

Compound	Origin	Features
Functional DRPs	Veneno Technologies	<ul style="list-style-type: none"><li>●Program to obtain functional Disulfide-Rich Peptides (DRPs) for selected target membrane proteins by using next-generation peptide discovery technology called “PERISS”</li><li>●Joint research agreement</li></ul>

Compound	Origin	Features
EM-001	EVerMed	<ul style="list-style-type: none"><li>●Extracellular vesicle derived from airway epithelial cells</li><li>●Candidate for the treatment of respiratory diseases</li><li>●Option agreement</li></ul>

## Multi-Regional Clinical Trials (Phase 3 study)

Title	EFZO-FIT study
Objectives	Efficacy and Safety of Intravenous Efzofitimod in Patients With Pulmonary Sarcoidosis
Study design	Randomized, Double-Blind, Placebo-Controlled Parallel Assignment Study
Outcome Measures	<div><div>[Primary Outcome Measures]</div><div>Change from baseline in mean daily oral corticosteroid (OCS) dose post-taper</div><div>[Secondary Outcome Measures]</div><div><ul style="list-style-type: none"><li>• Annual rate of change in absolute value of Forced vital capacity (FVC)</li><li>• Percent change from baseline in mean daily OCS dose post-taper</li><li>• Change from baseline in King's Sarcoidosis Questionnaire (KSQ)-Lung score</li></ul></div></div>

The Phase 3 trial is proceeding smoothly and scheduled to finish in FY2025

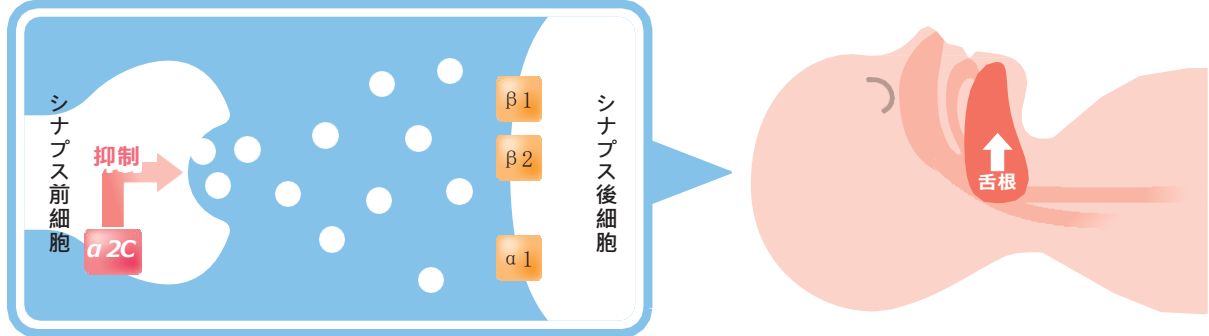

Target: Obstructive Sleep Apnea (OSA)

Features	<p>OSA is a condition characterized by repeated episodes of apnea or difficulty breathing during sleep, caused by the collapse of upper airway muscles, particularly the genioglossus.</p> <div><div><p>Excessive daytime sleepiness Fatigue Unstable sleep Snoring Headache</p></div><div>▶</div><div><p>Impact on daily life (Drowsy driving accidents, work-related accidents)  Comorbidities (myocardial infarction, stroke)</p></div></div>
Patients	<p>Over 1 billion people are estimated to suffer from OSA</p> <p>Moderate to severe cases (AHI over 15): 23.68 mil. In USA, 50.27 mil in EU 5 country, 9.43 mil in Japan*</p>
Treatment	<ul style="list-style-type: none"><li>• Continuous Positive Airway Pressure (CPAP) therapy</li><li>• Oral appliances</li><li>• Surgery</li><li>• Drug therapy (Tirzepatide was approved in the US in December 2024 as a treatment for moderate-to-severe OSA and obesity)</li></ul>

OSA is a disease with limited treatment options and high unmet medical needs

\* Lancet Res Med 7(8) 687-698, 2019

KRP-S124

Target	Obstructive Sleep Apnea (OSA)
MOA	ADRA2C antagonism leads to an increase in synaptic norepinephrine levels, thereby promoting genioglossus muscle tension and alleviating upper airway collapse. <div></div>
Patients	Moderate, part of mild, severe cases (0.1 billion patients in world wide)
Formulation	Oral
Status	Completed Phase 1 trial in Germany Under preparations for Phase 2 trial (aim to start in 2026)
Future direction	Worldwide development, including potential sub-licensing out

Aim for global sales exceeding 100 billion yen

## Chronic Spontaneous Urticaria (CSU)

- Unexplained urticaria characterized by itchy wheals (hives) or swelling of deep tissue, lasting for more than six weeks
- Caused by degranulation due to mast cell activation
- Approximately 40 million people worldwide suffer from CSU (Prevalence: 0.5-1%)
- Current treatments: antihistamines, anti-IgE antibody, anti-IL-4/IL-13 receptor antibody

KRP-M223

Target	Allergic and inflammatory diseases involving mast cells, such as chronic spontaneous urticaria	
MOA	MRGPRX2 antagonist	
Status	Pre-clinical stage	
Patients	Upfront payment	USD 55 million
	Millstone payment	Maximum of USD 777 million, development to commercialization
	Royalties	Undisclosed

- MRGPRX2
- G protein-coupled receptor mainly expressed on mast cells
  - Involved in mast cell-mediated allergy and inflammatory responses
  - Receptor for various ligands, including substance P
  - Induces degranulation via a signaling pathway distinct from IgE receptor-mediated reactions

Anticipated to be a promising therapeutic agent for patients who are refractory to current treatments

# KRP-DT123

Sep 2023, Specified clinical trial

Target	Tinnitus
Title	A Multicenter, Randomized, Double Blind, Sham Controlled Study using the App for Tinnitus Treatment in Patients with Tinnitus (Pilot Study)
Primary outcome	Change in THI total score from week 0 at week 16 after study app prescription
Subjects	Chronic tinnitus with associated suffering (18 years to 75 years)
Enrollment (Estimated)	60

Study results are scheduled to be announced at the fall 2025 academic conference

# KRP-DC125

Under development with Hyfe Inc., announced on Feb 2025

Target	Chronic Cough
Features	Digital therapeutics (DTx) Development based on the principles of BCST (Behavioral Cough Suppression Therapy), which is a non-pharmacological treatment method used to reduce chronic cough by facilitating changes in patient behavior, and utilizes cough monitoring technology powered by Hyfe's AI.
Market	2.5 million patients
Stage	Research/Development

Preparations are underway for the start of the clinical trial in 2025

## Initiatives toward Realization of Vision110 –Stage1–

# Vision 110

— Stage 1 —

Strengthening drug discovery capability to create high-value new drugs that meet medical needs

Expansion of development pipeline through in-licensing

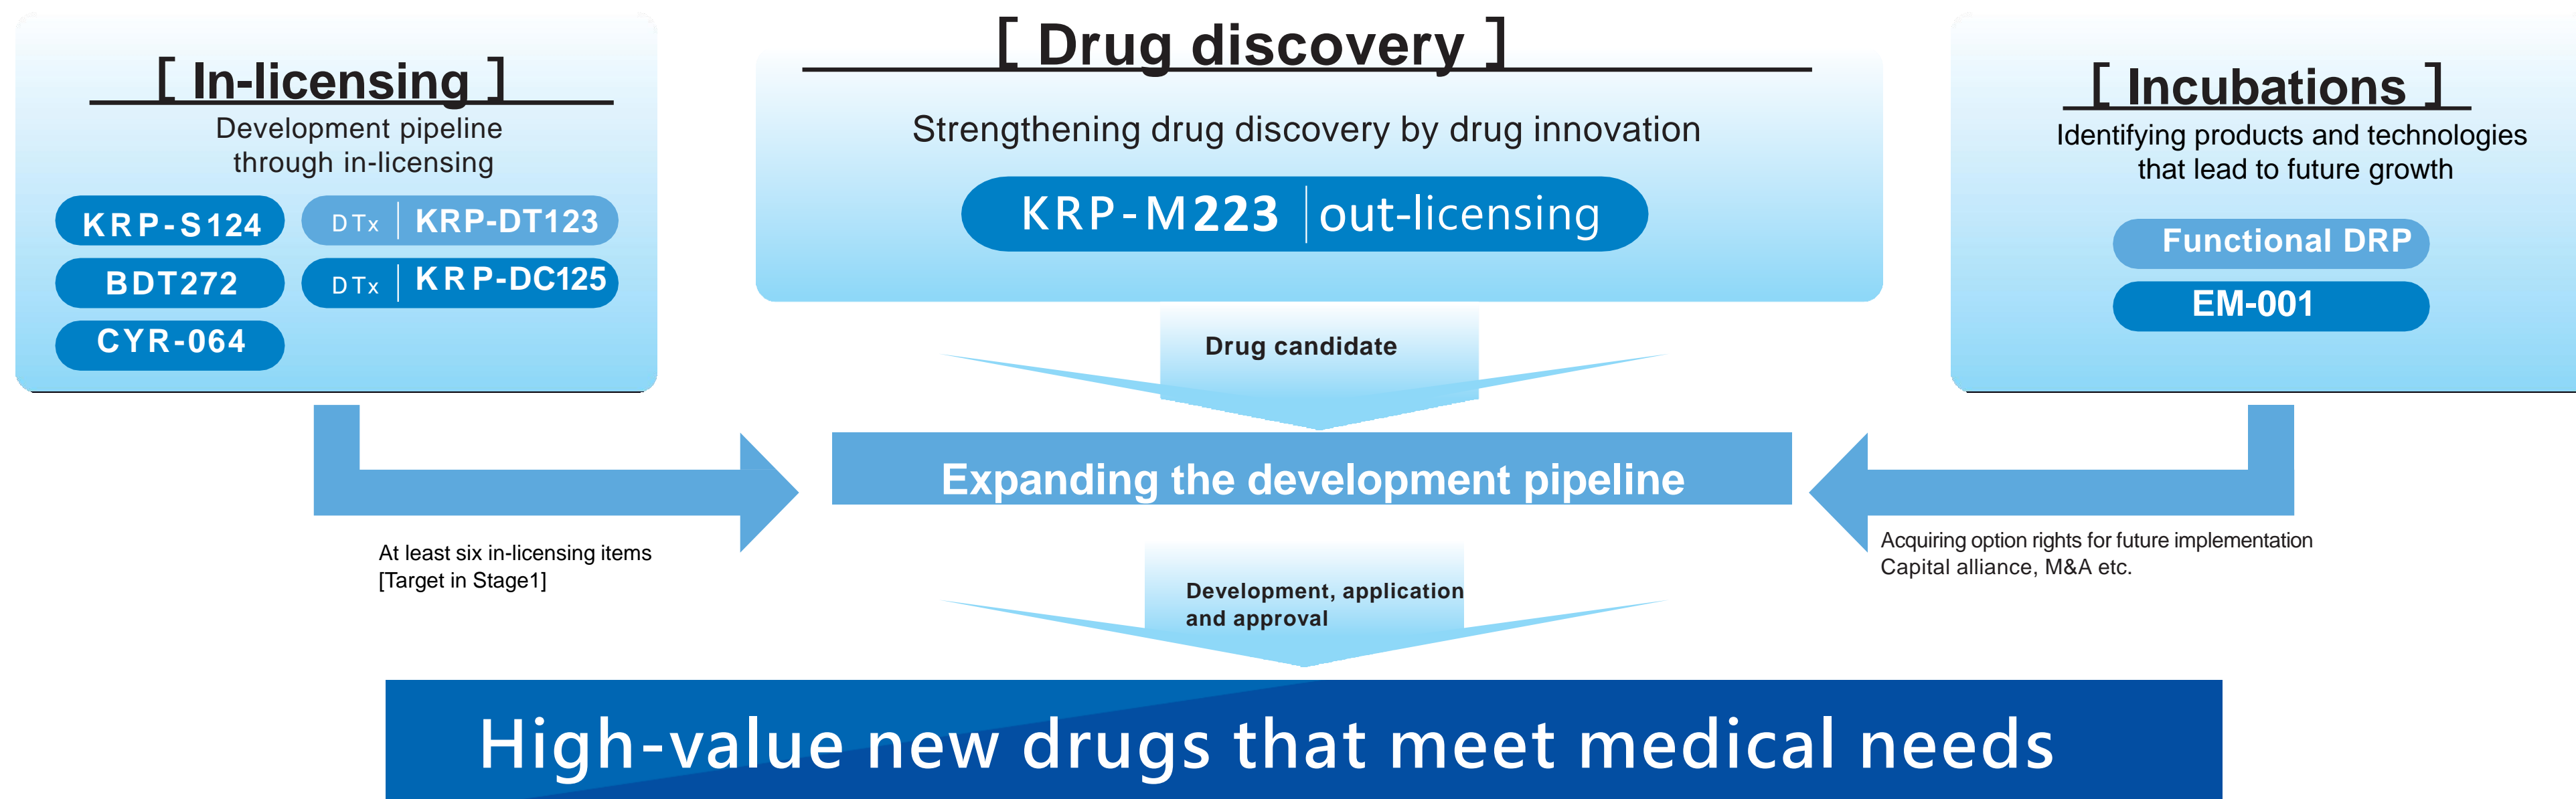

Maximization of the ratio of new drugs

Promoting healthcare-related businesses that have synergies with the new drugs business

Building a sustainable corporate foundation

# Strengthening drug discovery capability to create high-value new drugs that meet medical needs/ Expansion of development pipeline through in-licensing

## ● FY2024

Drug discovery	1 deal (out-licensing)
In-licensing	4 deals
Incubations	1 deal

## ● FY2025

Obtain at least two in-licensed assets (including marketed products) demonstrating high potential for rapid revenue generation.

# Maximization of the ratio of new drugs

## Ratio of new drugs | Exceeding the FY2025 target

## Product sales

# Maximization of the ratio of new drugs

Stage1 Goal		FY2024 Progress	FY2025 Initiatives
Beova®	<ul style="list-style-type: none"><li>No.1 sales as Beova in OAB market by FY2023</li><li>Achieving 50% share of OAB patients</li></ul>	<div>New patients acquisition rate55.3%<sup>*1</sup><sup>*3</sup></div> <div>Patient share42.3%<sup>*2</sup><sup>*3</sup> ( FY2023: 34.2%)</div>	<ul style="list-style-type: none"><li>Expand patient share in general internal medicine</li><li>Enhance the consultation rate and generate ongoing consultation opportunities in urology</li><li>DTC: initiative to encourage medical consultation</li></ul> <div>*3 Combined total with partner company</div>

## JRS Guidelines for the Management for Cough and Sputum

### Revision Point

- Clearly state the recommendation levels for cough and sputum treatment
- The importance of Cough Hypersensitivity (CHS)
- Detailed explanation of refractory chronic cough

Partial modification of the JRS Guidelines for the Management for cough and Sputum 2025. p.xv Medical Review

### P2X3 receptor antagonists for the management of persistent and chronic cough in adults, described on flowchart

- Consider the use of P2X3 receptor antagonists for refractory cough [Resistant to Cause-Specific Treatment (RCC) / Unexplained Chronic Cough (UCC)] as Cough Hypersensitivity Syndrome (CHS).

Partial modification of the JRS Guidelines for the Management for cough and Sputum 2025. p.v Medical Review

Based on the definition of refractory chronic cough and the positioning of P2X3 receptor antagonists clearly stated in the guidelines, promote their use as a recommended treatment

Vision110  
Stage 1

Strengthening drug discovery capability to create high-value new drugs that meet medical needs

Status in FY2024

- Out-licensing of KRP-M223

Initiatives in FY2025

- Promoting in-house research activities and acquisition of external technologies
- Expanding R&D pipeline

Expansion of development pipeline through in-licensing

- In-licensing
  - KRP-S124
  - BDT272
  - CYR-064
  - KRP-DC125

- Obtain at least two in-licensed assets (including marketed products) demonstrating high potential for rapid revenue generation.

Maximization of the ratio of new drugs

- Ratio of new drugs: 53.8%
- Sales of new drugs 54.1 billion yen

- Ratio of new drugs: 55.9%
- Target 58.0 billion yen, surpassing Stage1 goal of 56.0 billion yen

Promoting healthcare-related businesses that have synergies with the new drugs business

- Sales in infection-related products 12.0 billion yen
- Shipping Mucodyne and Amrozipine from Takaoka plant
- Establish production increase structure of Mucodyne
- GeneSoc mini2
- New products in GE

- Sales in infection-related products Target 12.7 billion yen, surpassing Stage1 goal of 10.0 billion yen
- Establish production increase structure of Mucodyne
- Transfer the production form Inami to Takaoka

Building a sustainable corporate foundation

- Operational efficiency and cost reduction

- Operational efficiency and cost reduction

Performance target

1. Performance targets (consolidated basis)		Performance target (Stage1)	FY2025(Forecast)
Growth potential	“Net sales” CAGR	At least 2%	3.9%
Profitability	Operating profit before deduction of R&D expenses (operating profit + R&D expenses)	At least 16%	13.0%

Difference in profitability between Stage 1 target and FY2025 forecast: Impact of exchange rates, rising raw material and energy costs, and the impact of “selective medical care”  
Aiming to improve profitability through sales growth, primarily of new drugs, and cost reductions.

2. Capital policy and shareholder returns

Increase capital efficiency through investment for growth and shareholder returns, with a constant awareness of the cost of capital and return on capital, while maintaining a sound financial base.  
Maintain a stable dividend, taking into account the DOE (Dividend on Equity) ratio.

Initiatives to improve corporate value  
in the medium to long term and drive sustainable growth

-Action to Implement Management that is Conscious of Cost of Capital and Stock Price-

- PBR was at 0.6x as of the end of March 2025, remaining below 1x, which we recognize as an issue for our company
- Aim to improve the PBR by increasing ROE and PER, through Stage1 strategy, maximization of the ratio of new drugs, strengthening cost competitiveness, strengthening drug discovery capability, expansion of development pipeline through in-licensing
- Aim to achieve an average ROE of 5% or higher (at least equivalent to our cost of equity) over the three years for Vision110-Stage1-

Reduction Target

The ratio of Cross-shareholding to net assets to be less than 10% by 2030

Total of holdings	25	21 (－4)	20 (－1)	20
Listed	14	12	11	11
Unlisted	11	9	9	9

Five holdings reduced in the past last four years

Aim to reduce at least one holding

● Dividend

FY2024

- Significant increase in profit in FY2024 compared to the previous year, primary due to the recognition of received upfront payment for the licensing agreement concluded with Novartis
- Increase the year-end dividend of 32 yen by 5 yen per share as a special dividend, resulting in a total year-end dividend of 37 yen.
- Total annual dividend, including the interim dividend of 20 yen will be 57 yen per year

FY2025

- Maintain an annual dividend of 57 yen (interim dividend of 20 yen, year-end dividend of 37 yen), based on our shareholder return policy of maintaining stable dividends in consideration of the DOE (Dividend on Equity)

● Cancellation of Treasury Stock

Treasury shares will be cancelled as part of measures to improve capital efficiency and shareholder returns

Class of shares to be cancelled	Common stock Company's common shares
Number of shares to be cancelled	4,662,295 shares (7.2% of the total number of issued shares before cancellation)
